Coastal Bathrooms 3d Design Service

Our no obligation design service begins with either David or Paul visiting your property to measure and carry out a survey. Both have over 30 years of experience in plumbing, bathroom supply and installation. They will take note of the room size, ceiling height, current plumbing configurations such as soil pipe location and positioning of pipes. Or alternatively, you are welcome to bring your plan/dimensions to us.

We will then add your dimensions to our amazing bathroom software and design your room with tiles, or wall or floor finishes, lighting and the desired or best fit bathroom products to compliment your room. We then render the image to give you a top quality, 3d photorealistic design showing different angles and features in the room such as sloping ceilings and recesses. These images can take several hours to produce.

You can view your exciting bathroom concept in our showroom and we will work with you to achieve the desired result. This takes time and we are more than happy to work with you on this – it's all part of the Coastal service. ☺

Should you wish to take away the design, a fee of £99.00 will be charged for each room, but this will be refunded once you place your order.
